Courses to take Summer 2015 to reduce your course load or time to degree:

1. Complete any missing prep courses (Math, Physics, Chemistry)

2. MECH&AE M20 (Intro to Computing: MATLAB): Requisite: Math 33A. This course is required for CH ENGR 109 which is offered in the Fall. **If you do not take this course in the summer, your time to degree will be 3 years.** This course will also be offered online.

3. CHEM 153A (Biochemistry: Introduction to Structure, Enzymes, and Metabolism): Requisite: Chemistry 30B. Taking this course now will reduce future course load.

4. ENGR 183EW (Engineering & Society): Taking this course now will reduce future course load.

Summer Advising:

- Attending orientation is recommended for all incoming students. Please visit the orientation website for more information: [www.newstudents.ucla.edu/transferstudents.htm](http://www.newstudents.ucla.edu/transferstudents.htm)

- If you are unable to attend orientation, you must sign up for email advising in order to enroll in courses for the fall quarter. Email [orientation@seas.ucla.edu](mailto:orientation@seas.ucla.edu) and notify us starting in mid-July that you cannot attend (include your name and UID).

Requisite Evaluations for Summer Enrollment:

1. For transfers from California Community Colleges: First check [assist.org](https://assistance.org) to see if you can verify you meet requisites for the summer course.

2. If you were unable to determine if you meet the requisite, then you may have courses evaluated. Email [course_eval@seas.ucla.edu](mailto:course_eval@seas.ucla.edu) for more information on the course evaluation process. Only UCLA summer course requisite credit will be evaluated.

3. **For students NOT taking summer courses, course evaluations will be completed at summer orientation. Please do NOT contact us about evaluations before then.**
