Courses to take Summer 2015 to reduce your course load or time to degree:

1. Complete any missing major prep courses (Math, Physics, Chemistry)
2. Civil and Environmental Engineering (C&EE) 101 - Statics and Dynamics. Requisites: Mathematics 31A, 31B, Physics 1A
4. C&EE M20 (same as MECH&AE M20) - Intro to Computer Programming with MATLAB. Requisite: Mathematics 33A

For a better chance to complete the major within 2 years, students with the following interests should take:
- Structural or Geotechnical Engineering - C&EE 101, 108
- Environmental Engineering / Hydrology - C&EE M20, MECH&AE 103
- Unsure of interests - C&EE 101, 108, M20 (it is recommended you also take MECH&AE 103)

Summer Advising:
- Attending orientation is recommended for all incoming students. Please visit the orientation website for details: www.newstudents.ucla.edu/transferstudents.htm
- If you are unable to attend orientation, you must sign up for email advising in order to enroll in courses for the fall quarter. Email orientation@seas.ucla.edu and notify us starting in mid-July that you cannot attend (include your name and UID).

Requisite Evaluations for Summer Enrollment:

1. For transfers from California Community Colleges: First check assist.org to see if you can meet the requisites for the summer course.
2. If you were unable to determine if you meet the requisites, then you may have courses evaluated. Please contact course_eval@seas.ucla.edu for more information on the course evaluation process.
3. For students NOT taking summer courses, course evaluations will be completed at summer orientation. Please do NOT contact us about evaluations before orientation.
